

Glide Travel Technology Co Ltd.

About Us

Glide is an AI company that offers a data-driven tool to maximise efficiency in travel planning using crowdsourced intelligence. We envision to redefine the travel planning experience to be pleasant as it always should be. Through crowdsourcing, efficient information exchange can be achieved under a sustainable eco-system of travel planning.

We joined the Seed Programme at HKU iDendron & recently admitted to pre-incubation program at Hong Kong Science & Technology Parks. We are looking to acquire more talents to join our mission-driven team. Please join us if you are passionate about innovation and travel tech.

Full Stack Developer (6 months contract with potential to turn full-time positions)

Responsibilities:

- Primarily back-end development for mobile-application (React Native & Node JS) & Web-application (ReactJS).
- Work on data analyses to utilize and refine machine-learning algorithm that connects users with similar interests to like-minded travel itineraries and relevant products.
- Design, architect, implementation, deployment, problem diagnosis and bug fixing of the web-application under the governance of senior developers.
- Build data components for reporting and analytics.
- Perform testing to ensure quality delivery of application, learn and being coached by senior developers via code review meetings.
- Collaborate with project managers and users to ensure requirements and aggressive schedules are met.
- Perform any other legitimate duties assigned by supervisors.

Job Requirements:

- Degree / Higher Diploma in Computer Science, software engineering or related discipline.
- Prefer 1 - 2 year of relevant experience (Fresh graduates are also welcome to apply).
- Passion in innovation and eager to learn, with positive working attitude and a good team player.
- Proactive and fast learner; able to work in a fast-paced start-up environment.
- Enjoy building applications that people really like and use, including yourself.
- Good command of spoken and written English and Chinese.

You will be at an advantage:

- If you are familiar with React Native, node.js, and/or having previous software development experience i.e. internship / coursework / coding competition
- If you have sample projects / code to share

What You Can Expect From Us

- Joining at the early stage you will have the opportunity contribute to the evolution and growth of the application
- You can expect mentorship through 1-on-1 pair programming sessions, in-house tech trainings and code review meetings

We Offer

- Flexible working hours, optional 1 day per week work from home arrangement
- Remote work option
- Open-minded working environment

We offer rewarding career with attractive package to the right talents. Please join us if you are ready for a challenge and want to be part of the team to shape the future of travel tech.
